Employment

- **LinkPro** (since 2015) - **[Programmer]**

Japanese company specialized in research and development of image analysis and processing.

- * Development of a web system to manage a device used to assist the elderly using heat and motion sensors.

- * Creation of control panel in HTML, CSS, and Javascript for the camera that own algorithm to increase the sharpness of the image incredibly, made by the company itself.

- * Participation in the creation of a desktop software using Electron where it performed the image processing with an algorithm created in C ++ by the company itself.

- * Creation of web server to manage desktop software using Zend Expressive and Vue JS technologies.

With this company, I had the opportunity to move from Brazil to Japan so I can improve my professional life as a personal one. And also the opportunity to work with excellent technologies like Electron, Zend Expressive, and Vue JS.

- **EC-Giken** (2013 - 2015) - **[Programmer]**

Japanese company specialized in Magento e-commerce platform.

- * This work was done in Brazil with a member of the team who translated the tasks and passed on.

- * I worked with Magento customization in both the layout and the system features.

- * Creation of modules for Magento.

- * Participation in the creation of a system to integrate Japan's big e-commerce (amazon.co.jp and rakuten.co.jp) into a unified platform for selling products using Zend Framework 2.

With this work I had the opportunity to get to know this amazing Magento platform and the peculiarities of a Japanese e-com

- **Inove sua Escolha (2011 - 2012) - [Programmer]**

Specializing in digital marketing, e-commerce development, and websites.

- * I started working with website development using technologies such as PHP (Framework CodeIgniter), MySQL, HTML, CSS and JavaScript (jQuery).

- * Customer internal system integration using Web Services.

- * Payments integration with credit card companies.

After a few months, I was invited and managed a few programmers thus dividing my work between management and development where I stayed for the rest of the time I worked here.

- **Hnet Sistemas (2011 - 2011) - [Programmer]**
